

FAASTeam presents:

Aircraft Logbooks – Does yours meet the Standards? Do you know the Standards?

At this month's Pilots' Workshop, FAA Safety Team Program Manager Ron Reeves and Willamette Aviation General Manager Dave Waggoner will offer a look at Aircraft Logbooks and what you should know about them as a pilot. This Pilots Workshop will delve into three areas:

1. To learn how the FAA defines "airworthiness" using aircraft logbooks
2. To review the requirements of what must be properly logged for an aircraft to be "airworthy"
3. To address the owner/operator and PIC responsibilities for the airworthiness of an aircraft.

Bring your aircraft logbooks for a courtesy look to see if they meet all the requirements of the FAA.

Directions: DRIVE IN - Two miles south of Wilsonville, just off I-5. 1/4 mile south of Arndt Rd.

FLY IN - Taxi to the very north end of the Aurora airport. Park on the ramp between the fuel island and the FBO building.
AVOID OVERFLYING POPULATED AREAS.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
